EXPERIENCE

2023 - NOW **Frontend Developer**

CodeBook: E-Commerce Web Development Project

- I created a visually appealing e-commerce website using ReactJS and Tailwind CSS, featuring:
 - React Router: Seamlessly managed dynamic page navigation.
 - Real-time Cart: Implemented with React Context and Reducer for a smooth shopping experience.
 - Filter Functionality: Enhanced user experience with a powerful product filtering system.Additionally, I incorporated JSON-server and JSON-server-auth to manage user accounts and authorization, ensuring secure and efficient authentication processes.

CinemaLover: Movie Web Application

- I developed a dynamic and responsive movie web application using React.js, Tailwind CSS, and the MovieDB API.
 - Dynamic Page Routing: Implemented seamless page navigation using react-router-dom, enhancing user experience.
 - Dynamic data displays: Designed the app to present real-time movie information, enabling users to explore details, reviews, and cast information
 - Responsive Design: Utilized Tailwind CSS to create an attractive and adaptable interface, ensuring a great user experience on various devices.
 - API Integration: Integrated the MovieDB API to provide users with up-to-date movie listings, reviews, and posters, enhancing the app's functionality.

2021 - NOW **Freelance Writer**

SEO Content Writer/ Copy Writer/ Content Writer

- I've authored over 50 pieces, ranging from restaurant and beauty clinic reviews to product ads and informative content that resonates with my customer. By incorporating SEO research, my content is optimized for search engines and drives traffic.

2021 - 2022 **Quality Engineering**

Asahi Intecc Thailand Co.,Ltd.

- Managed NCR and DCR processes, handled customer claims, collaborated with the development team to create reports for senior management, all to improve process efficiency and customer satisfaction.
